## TUTORIAL

### How to recover my data...

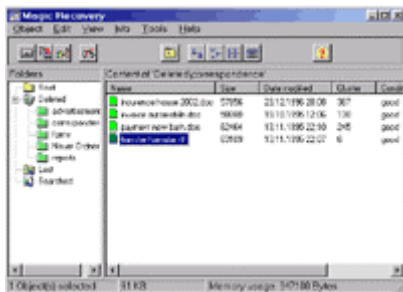

1. [Files have been deleted or Windows-recycle bin has been emptied](#)
  2. [Files/directories are lost](#)
  3. [Hard disk has been quick-formated](#)
  4. [A volume is lost, e.g. due to damaged partition table](#)
  5. [Windows ist damaged and not bootable](#)
- 
1. Files habe been deleted or Windows-recycle bin has been emptied  
Select **Drive** from **Object** menu.

Select drive as **Logical drive** which contains the deleted data.

Look for your file from **Deleted**.

Select your file (for several files use CTRL or SHIFT key) and save your file to another drive by selecting **Save to...** from **Object** menu.

In addition you can search for a deleted/lost file (or for several files) by selecting **Find** from **Object** menu.

Easy, fast an inexpensive
